SGPA 8.69

## Projects

- **Development and Validation of Analytical method For Estimation of Cyproheptadine by Reverse Phase- High Performance Liquid Chromatography.**  
To develop analytical methods for estimation of Cyproheptadine by spectrophotometry such as UV-Visible and Reverse Phase-High Performance Liquid Chromatography (RP-HPLC).
  - Selection of solvents.
  - Identification of drug sample.
  - Development of spectrophotometric methods.
  - Validation of developed methods.
  - Assay for marketed formulation.
  - Statistical comparison of methods.To develop and validate RP-HPLC method for estimation of Cyproheptadine
  1. Selection of mobile phase and optimization of developed method.
  2. Development of RP-HPLC method.
  3. Assay for marketed formulation.
  4. Validation of developed method according to the ICH guidelines.
